

DATASHEET ZSCALER WEB SECURITY

Unmatched protection against advanced and emerging threats

OVERVIEW

Zscaler Web Security leverages the world's largest global security cloud to provide the industry's only 100% cloud-delivered internet security solution. And, because it relies on our patented, multi-tenant cloud architecture, it delivers all the benefits of proactive, real-time security without the need to deploy and manage appliances, software or agents.

With Zscaler Web Security, IT security teams can instantly create and deploy granular web-based policies—by user, group, location or action—to anyone, anywhere and on any device. It's that easy!

BENEFITS

Gap-Free Security

- Instant protection against threats and vulnerabilities without the need to patch
- Safely embrace the power of Web 2.0 applications and social media
- Easily secure all smartphones and tablets without an agent

Cost Savings

- No appliances, software or clients to deploy and manage
- Just pay as you go—no patching, no updates and no backhauling!
- No buying excess capacity—the cloud scales elastically as needed

Simplicity and Efficiency

- Eliminate complexity and point products—nothing to deploy and manage
- Global policy management—one policy follows users all around the world
- On-demand service—direct traffic to the cloud quickly and easily

Compliance and Real-Time Reporting

- Helps meet regulatory and industry compliance—HIPAA, PCI, FISMA, etc.
- View any transaction, by any user, from any location, in seconds
- Comprehensive DLP across all devices

Global Cloud Coverage

- World's largest global security cloud
- Five 9s availability—local, regional and multi-continent redundancy
- Near-zero latency

No Hardware.

No Software.

No Compromise.

➔ **Stops today's Advanced Persistent Threats—in real-time**

➔ **Secures Web 2.0 Applications and Social Media**

➔ **Secures PCs, laptops, smart phones and tablets**

Zscaler integrates web, email, and mobile security—one policy, one console, and one global security platform. Ensure gap-free protection against advanced threats, 0-day attacks, and data theft with one seamless solution.

DATASHEET

ZSCALER WEB SECURITY

Mobile Device Security

- Day-1 security for iPads, iPhones, tablets and Smartphones
- Secure any device, anywhere—all without any agents
- Enforce a consistent user policy across all PCs and mobile devices

FEATURES

Advanced Threat Protection

Zscaler’s context-aware, zero-hour security scans every byte of inbound/outbound traffic to secure devices, users, data and web applications against advanced threats. Inline ByteScan™, Full SSL scanning and cloud intelligence protects against botnets, malicious active content, phishing, XSS attacks and more.

Web 2.0 and Application Control

Leverage the power of Web 2.0 Apps and social media without compromising productivity or security. Now, IT teams can easily create granular global policies—based

on users or groups—for webmail, streaming media, social networking and IM.

Bandwidth Control

Easily and efficiently allocate bandwidth to prioritize business-critical web applications over recreational usage.

URL Filtering

Zscaler enables organizations to limit their exposure to liability by managing access to web content for users, groups and locations. URLs are filtered against more than 90 categories, 30 super categories, and 6 classes.

Unified Policy and Reporting

Zscaler delivers one, unified console to create web policy across security, internet access management and data loss prevention. Administrators manage their own policy—with changes instantly reflected across the entire cloud.

WEB SECURITY SUITES AT-A-GLANCE

	WEB THREATS SUITE	WEB STANDARD SUITE	WEB ADVANCED SUITE	WEB PREMIUM SUITE
Global Cloud Platform Protect HQ, remote offices, laptops and smartphones. Full AD and LDAP Integration.	✓	✓	✓	✓
